52 Donald Street
So. Dartmouth, Massachusetts

June 1966

Vol. 2 No. 6

Club Meetings Are Held Every Thursday Night At 7:30 P.M. Visitors Are Welcome.

ZERO BEAT STAFF

Editor - Art, N1VI
Typist - Barry, N1JED
Art - Bill, K1IBR & Jayne, N1JOM
Printing - Jossie, K1SLX & Mike, N1BZJ

On our first weekly raffle we had two prizes to offer. The first prize was a VOM donated by N1JOM. The second was a V3-1 and surprise was won by N1BZJ and the VOM was won by N1JED. The club took in a total of \$15.00.

The prize for the second raffle held at the club was a full years subscription to 73 magazine. The lucky winner was K1IBR. Bill already subscribes to 73's and although he had an option of extending his subscription he generously donated the years subscription back to the club.

Bill - N1APX has been running fono patches for some of the exchange students in the area. All of the patches are with South America.

Ray - K1VOK, is putting an emergency station in the back of his station wagon. It will be equipped with a Gonset Commander, BU 348, N3 74 VFO, a homebrew keyer and a portable antenna. The station will be used on 3M only. (WITH ALL THAT EQUIPMENT HE'LL HAVE TO RUN BESIDE THE CAR NOW.)

N1JLU - Lefty, has added a keyer and a Johnson phone patch to his station. The next piece of stand-by gear is going to be a SWAN 350.

FLASH!!! If anyone wants to plant potatoes in their garden you better get a hold of Mike N1BZJ. From what I hear he does a real good job.

Here's something for you guys who hunt certificates. June 4th to the 10th is Amateur radio week in Rhode Island. Stations in R.I. Qso with 10 other R.I. stations, Mass. and Conn, Qso with 5 R.I. stations. All others Qso with 3 R.I. stations. Only Qso's during this week will count. Send information to:
R.I. AMATEUR RADIO WEEK BOX 1662 PROVIDENCE R.I.

Ray - K1JIU does it again, now he worked a KH6 with a dipole antenna inside his house on 20 meters.

OPP'S

You might ask, what is Field day? Well to most people field day is just another club activity but; to others it is the time of the year to show the public what we the ham operator can do in times of an emergency.

This year S.E.M.A.R.A. is doing just that. We will be running portable with emergency power just as if the public was depending upon us for emergency communications.

There will be many people and club groups competing in this contest, so we will need all the help and support of all our club members. As field day chairman, I hope that everyone will go out with the feeling to win or place at least on top with the others. This will not be an easy task for there will be a lot of others participating. Keeping this in mind I hope to see all our members participating in field day whether licensed or not.

Regarding the operation of the members, I plan to have their operation scheduled which will help to stop a lot of confusion. During the day we will need a lot of operators because, most of the bands are open. We would like to have a operator and logger on each band during the whole field day. If you are sure to be available at a certain time please sign the list at the club house or contact me. WA1BJ, mike at 4-9464. 73's see you field day.

WITH THE NOVICES

During the past few months the 15 meter band has been opening quite regularly, and some good DX is easily worked. Those of you novices who want to work DX can get on and see what you can work. Due to the fact that we are on c.w. not much power is really needed for skip conditions. Any other information on the novice band will be appreciated. 73's for now.

Call WA3CCM

Each month we pick one of our club members and do a write up on how he operates. This helps the other members get to know him better. Well this month we have picked on our president. Ray Smith, or K1VOK is the holder of a general class ticket, and is on all bands from 30-6 meters. He joined our club in February 1965, and is a member of the A.L.R.L. He hold a few appointments in that organization. Ray handles traffic quite a lot and usually can be found in most of the nets in the area. Well thats all for this month, BUT smile you may be next!!

HAM IN VIET NAM

K1ype/xv5 is operating on 14.315 kc. at 2330 GMT everyday. He is not looking for QSO's. He has very important skeds arranged. If your lucky you may get a QSO with him either before or after his skeds.

Excerpts from the 1956 Annual Board Meeting report was received from Bob Chapman, H.W. However, the report was too lengthy to be incorporated in this issue, the report has been posted on the clubs bulletin board. All members are urged to read these excerpts and watch for the full report in the future issue of JST magazine.
